## **DETAILED ACTION**

### ***Response to Amendment***

1. The preliminary amendment to the claims has not been entered because it is not in the proper form. (See MPEP Rules §1.121 (c)).

### ***Election/Restrictions***

2. Applicant's election without traverse of the invention of group I, claims 12-14 in Paper No. 4 is acknowledged.

### ***Information Disclosure Statement***

3. The references submitted with the information disclosure statement filed on September 28, 2000 have been considered. Since the applicant did not provide a 1492 with available space for the examiner to initial each reference, no copy of an initialed 1492 is being returned.

### ***Specification***

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent No. 6,323,131 to Obeng et al.

Regarding claim 12, Obeng et al. teaches an integrated circuit (FIG. 1(d)) comprising:

- a substrate having a circuit device;
- a dielectric material (10) over the circuit device with a via to the circuit device;
- a barrier material (18) lining the walls of the via;
- a seed layer overlying the barrier material and lining the walls of the via (Col. 4, lines 21-24); and
- a conductive material (20) directly contacting the circuit device.

Regarding claim 13, Obeng et al. teaches an integrated circuit, wherein the circuit device is an interconnection line.

Regarding claim 14, Obeng et al. teaches an integrated circuit, wherein the conductive material is copper.
